Liquor

Save time. Save money.

Increase store efficiency

- Speed up your checkout process by ringing up items and completing payments faster to improve cashier productivity.
- Eliminate repetitive tasks to simplify your operations with a customizable POS.
- Analyze what's happening in your store at any time during the day in order to optimize the management of your business.

Secure your data

- Be sure that you meet the regulatory and policy requirements for credit-card acceptance and store all your product, employee, and customer information securely.

Reduce errors

- Have tight control over your cash operations, use the software securely, and restrict operations based on user-level permissions.
- Interfaces to the proper hardware for scanning or weighing products, print the right items on cash receipts, and store your information in a secure audit trail.
- Simplify your cashiers' work-flow and eliminate errors with EMV/PCI Compliant integrated payment options that are compatible with all major processors.

Manage inventory

- Know your quantities on hand, monitor your losses and know your inventory changes so you can detect theft, damaged goods or spoilage.

Centralize management at headquarters

- Manage remote store data communication and centralize your management activities at headquarters.
